Republicans of the County and Mass Convention Speak Strongly for Next Governor

THE NOMINEES INDORSED

The Resolutions Which Were Passed Denounced the Robbery of the State Ballot, Etc.

REPORT OF THE CONVENTION HELD

The Republicans of McCracken county met this afternoon in mass convention at the city hall to name delegates to the state convention at Louisville, July 17th, to nominate a candidate for governor.

After a few remarks by County Chairman F. M. Fisher, who called the meeting to order, Captain J. E. Williamson was unanimously chosen chairman, and J. W. Moore was elected secretary.

A committee on resolutions was appointed as follows: Messrs. F. M. Fisher, M. W. La Har, E. E. Bell, C. W. Merriweather and J. H. Ashcraft. They reported the following resolutions, after enthusiastic remarks had been made by Dr. Frank Boyd and Mr. Will Farley.

Resolved by the Republicans and lovers of civil liberty of McCracken county in convention assembled.

First, That we heartily approve and ratify the wise selection made by the national convention at Philadelphia naming that matchless statesman, soldier and citizen, Hon. William McKinley, president, and that gallant cavalier and patriot, Theodore Roosevelt, for vice president, more capable and worthy leaders could not be found, nor could better selections have been made.

We heartily approve the platform adopted by said convention and pledge it our support and honest endeavor.

2. We recognize the present as the crucial period in the battle for civil and personal liberty in Kentucky. Being fully cognizant of the importance of every citizen asserting his right to vote and to have that vote counted as cast, and to that end we condemn the usurpation of the office of Lieutenant Governor Marshall, the first overt act in the long list of crimes for which the trustees are entirely responsible.

We condemn the falsification of the records of the house as anarchistic and a fraud, being the only recourse for evidence, were a travesty on justice perpetrated under the deception of "Forms of Law."

We condemn the usurpation of the office of the state from the chosen representatives of the people. The Gaelic Democracy being responsible for all the crimes that have been perpetrated, as well as for all the odium that is now heaped on our state; we pledge ourselves to unite in rebelling it to that oblivion to which it so justly belongs and from which we hope it can never be resurrected.

3. We approve, and defy challenge, to the acts of the administration of affairs of the nation and state by the last Republican executive; no national administration ever had as many grave and serious questions to contend with as our present chief executive, and there are none who ever handled the affairs more creditably or with more success; no state administration was ever more ably conducted and with as much economy as the one under the leadership of Governor William O. Bradley, hence we feel no hesitancy in having a continuance of Republican rule.

4. We welcome to our ranks the thousands of fearless, conscientious, able Democrats and Populists who love their state and justice more than a degenerate party; we pledge to them our eternal gratitude and assure them a hearty welcome. The fight for civil liberty and personal liberty being a mutual one our united efforts are necessary for success, and success it must and will be.

5. We deplore and denounce assassination, especially that of Senator Joel Chandler, and we denounce with equal energy and earnestness all attempts to give the acts a political tint.

THE WEEK IN BUSINESS

THE BANK CLEARINGS FOR THIS WEEK WERE \$521,154.10.

The Usual Summer Quietness Is felt in Most Lines—Coal and Iron Show Great Activity.

Business in banking circles was not as heavy this week as it has been for sometime, but it is fully up to the average for this time of the year.

WHISKY.

The wholesale trade is experiencing the usual mid-summer lull at present but fall prospects are good.

GROCERIES.

The wholesale grocery trade shows no appreciable change this week. Business is fully up to last years record with most of the local houses, with future prospects very encouraging.

COAL AND IRON.

The local coal market for steamboat and foreign trade is very active at present. One concern alone had inquiries in the past few days for 100,000 tons to be taken within the next twelve months. It is thought it is probably for export.

VINEGAR.

The vinegar business of local dealers and manufacturers is splendid. Mr. O. L. Gregory, of Wallace & Gregory Bros., who own one of the largest vinegar establishments in the country, reports an increase of over 20 percent in his business over last year.

COTTON.

The cotton ginners are making a good run for their plant. The market for the finished product, it is true, is off a good deal, yet prices on the raw material continue very stiff.

TOBACCO MARKET.

Tobacco ruled strong the past week. The offerings were very light and there were sales only one day, Wednesday. The stocks on hand are about depleted and the tobacco people are, seemingly, in for a good, long rest.

RETAIL TRADE.

The general retail trade is about on a par with last year, although some few houses report dullness. Some, however, report a nice increase. But on the whole there is no noticeable change.

WIDESPREAD DRY GOODS.

The dry goods merchants are doing the usual volume of summer business. Trade in this line has experienced the general prevailing dullness, yet the merchants are not complaining.

HARDWARE.

The hardware trade is normal. Some of the local houses have been traveling all month and preparing for the coming season. Retail trade with them has been fair.

GRAIN.

The Paducah Mill and Elevator company is now receiving good quantities of wheat daily. The price has reacted some in the past few days all over the country, and the same is true of the market here. The Paducah Mill and Elevator people are running full time and sales are satisfactory.

THE GOLDEN OPPORTUNITY.

A Report Which Has Shocked and Angered Russia to the Top Pitch.

ARE WORSE THAN FIENDS

The Killing of the German Minister Reported by the Mairies and Slaughterer Precipitated Thereby.

WORSE REPORTS TO BE CONFIRMED

ST. PETERSBURG, July 14.—Admiral Alekoff, at Port Arthur, sends shocking details of the murder of Russian Minister Dr. Giers and wife at Peking. They were beaten, prodded and boiled alive in the public streets. Mrs. Dr. Giers suffering fate more terrible than death before life was extinct. The remains were then thrown to the dogs. Russia is wrought up to the top pitch over the terrible affair.

LONDON, July 14.—A Japanese official report says the German minister, after the German minister had been murdered at Peking, attacked and burned the Chinese foreign office, killing a hundred Chinese. This is what precipitated the slaughter which later followed.

TEMPERATURE AND SEEDS.

To those curious as to the effect of extreme cold upon seeds it may perhaps be of interest to give a recent illustration from "Notes and Queries." At Dover, on September 15, Mr. W. Threlton-Dry described, at the meeting of the British Association, experiments which he had carried out in conjunction with Professor Dewar to ascertain the influence of the temperature of liquid hydrogen on the germination power of seeds. The experiments showed that life was sustained at a temperature so low that ordinary chemical action was stopped. Seeds of barley, vegetable marrow, mustard, and the pea, were actually immersed in liquid hydrogen for upward of six hours. The seeds came out of the ordeal bright and apparently unchanged, and all germinated after they were planted. The lowest temperature to which they were subjected was 462 degrees Fahrenheit below the temperature of melting ice.

A Smart Heist.

Talleyrand, the great French diplomatist, was entertaining one night, an officer arriving late, said that he had been detained by a penguin. The French soldier's nickname for a civilian. Talleyrand, affecting not to know, asked what a penguin was. "Oh," replied the officer, with a free-and-easy shrug, "we call everything a penguin that is not military." "Indeed," answered Talleyrand. Now, with us we call everything military that is not civil.

CUTTING QUILL PENS.

It Was a Work of Art That Everybody Could Not Do.

The art of cutting a quill by adept "quill-drivers" was dying out when I first began schooling. Steel pens had been known for some time, but were not in general use. The goose quill pen died a hard death as a commonly used writing tool. My first school-master was a first-rate hand at cutting a quill, and he could use it with wonderful effects in flourishes. It was his boast that he could fill the first page of a high school book with name, age, date and flourishes—in which were depicted wonderful awans and other birds—in such a fashion that none but experts like himself could tell where the quill pen was taken from the paper for a fresh dip. My last master could neither cut a quill nor use one with advantage. Quills as pens remained in use in some houses as the only writing tool up to a dozen to twenty years ago. Those who can cut a decent writing quill are now few. People used to ask for "a quill pen," or "a quill," when they wanted a pen, and both ailed and quill were always called "pens," buyers asking for fine or other "nibs" or "nibs." Nowadays nearly all ask for "nibs" when they require pens. The word "pen" has almost dropped out of usage, except to express the pen and holder combined. Persons invariably ask for a box of "nibs," appearing to lose sight of the fact that "nib" or "nib" is a point, and that the points of pens alone are not to be had. One would think that in these days of much schooling teachers would define "pen" from "point" or "nib," but they, too, ask for "nibs" when they mean "pens." Children only know a pen as a holder and pen combined. They ask for "nibs" or "pens," and when asked if they do not mean "pens," the reply is "Not nibs!"—Notes and Queries.

Tennyson and His Pipes.
During the past season much has been written about Li Hung Chang's method of smoking. The peculiarity of this habit of one nearer and dearer to us—Tennyson—is decidedly unique. A writer says of the great poet: "His common clay pipe was his choice. His den was at the top of the house. When he sat down to work in the morning a huge tobacco-jar, big enough for a one-eyed giant, was at his feet, together with a box full of white clay pipes. Filling one of these, he smoked until it was empty, broke it in two and threw the fragments into another box prepared for their reception. Then he pulled out a fresh pipe, filled it, smoked it and destroyed it as before. He would not smoke a pipe the second time."

BECKHAMITES WIN.

The Vote of this County is Secured for the Young Usurper.

In the Democratic precinct meetings in Paducah all the precincts but the Flow Factory instructed for Beckhams, the one exception being for Lewis, and this will insure him the county vote. There was very little interest taken in the meetings and the attendance at the county court house precincts, the largest in the county, was hardly one hundred. The work on hand was quickly and tamely done. The Beckhams were happy.

Charged With Stealing.
Charles Finney, of near Ashtabula, was arrested Monday afternoon, charged with stealing seventy-five dollars and a jug of whiskey from the backster wagon of Jesse Bailey, near Farmington, says the Mayfield Mirror. Finney was unable to give bond and was brought to the city Monday night and locked up to await his exauditing trial, which is announced to take place at Ashtabula today. The alleged theft was committed Sunday night. The money and whiskey were locked up with some other goods in the wagon and some one broke into it.

Better Resting Than Cuba.
A very interesting sight is to be seen in the Dublin (Ireland) zoological garden, Phoenix park, just now, viz., a Irish red setter, rearing three lion cubs. These youngsters were born on the 12th of October last and are now over nine weeks old. Their mother is a forest born lioness, and she would take no notice of her progeny, so they had to be taken from her an hour or two after birth and fed from an ordinary baby's feeding bottle for a couple of days till the setter was regulated. She was not at all anxious to adopt the novel fosterlings, and it was only by sprinkling the foster-mother's milk over the cubs that she was induced to take to them. Then a couple of pups that were left with her were removed, and the poor setter took to the ungaily cubs as affectionately as if they were her own.
